

## 2019 Meeting of the APS Far West Section

November 1-2, 2019

Stanford University

### Derivation of cosmic acceleration and the cosmological constant in the local universe□

"Once correctly and explicitly phrased, the principles of SRT (Standard Relativity Theory) allow for a wide range of 'theories' that differ from the standard SRT only for *Synchronization Gauges and the principles of special relativity.*

the difference in the chosen synchronization procedures,  
but are wholly equivalent to SRT in predicting empirical facts."

Emphasis added. Rizzi et al. (2008)
